

CS 161 - Week 1 Homework Programming Assignment

Write a program that performs simple math on two integer values entered by the user. The program should:

- declare variables for the two numbers and the answer, using appropriate labels
- prompt the user to enter 2 values
- compute the sum & output the answer
- compute the difference & output the answer
- compute the product & output the answer

SAMPLE RUN:

```
This program will do some basic math on numbers you input.  
  
Enter two integers, separated by a space.  
Press Enter after typing in the second integer.  
5 8  
5 + 8 = 13  
5 - 8 = -3  
5 * 8 = 40  
  
Process returned 0 (0x0)   execution time : 6.340 s  
Press any key to continue.
```
